A History of Natural Philosophy by Edward Grant
Natural philosophy encompassed all natural phenomena of the physical world. It sought to discover the physical causes of all natural effects and was little concerned with mathematics. By contrast, the exact mathematical sciences were narrowly confined to various computations that did not involve physical causes, functioning totally independently of natural philosophy.

A History of Natural Philosophy: From the Ancient World to ...

Because of this equating natural philosophy with any kind of reflecting on nature, Grant misleadingly expands his narrative to include virtually all of world history, which is a far cry from the generally understood formal beginnings of natural philosophy with Jacopo Zabarella and his chair in natural philosophy at Padua in the 16th century (with direct roots going back to Aristotle).

A History of Natural Philosophy: From the Ancient World to ...

While this survey of natural philosophy is indeed comprehensive, I felt it to be quite haphazard and lacking structure beyond the historical timeline given. Moreover, Grant tends to overemphasize biographical sketches of thinkers as well as the issue of translating text across

cultures, which I found to be tangential to the philosophical exposition for which I was hungry.
