Building Information Modeling (BIM) is the process of generating and managing building data during a building's lifecycle. Today, more and more architectural firms have adopted BIM software and processes because it allows them to produce measurably more work of better quality, in shorter periods of time.

[Implementing successful building information modeling ...](#)

Architect Epstein provides a detailed explanation of the primary elements of building information modeling (BIM), an increasingly popular system for generating and managing information about buildings over the course of their life cycle. Topics include an introduction and history of BIM, implementation planning, the BIM process, quality control and risk management, interoperability and open
