Momentum and Impulse Connection - physicsclassroom.com

Impulse equals momentum change and the momentum change is greatest in case B (as stated above) Observe that each of the collisions above involve the rebound of a ball off a wall. Observe that the greater the rebound effect , the greater the acceleration, momentum change, and impulse.

What are momentum and impulse? (article) | Khan Academy

Because we are dividing an impulse by a force the force on the fuel due to earth's gravity the force units cancel out, and the units for specific impulse are simply seconds. A rocket might have a specific impulse of 300 s.

Impulse - Physics Tutorials

IMPULSE We discussed above the factors changing momentum which are mass and velocity. In most of the case mass is constant and for momentum change velocity changes. If velocity changes then acceleration occurs. In the first unit we said that force causes acceleration in other words change in the velocity is the result of applied net force.
