### Knowledge

The PCV is a conjugate vaccine (see our page on 'Types of vaccine'). Sugars (polysaccharides) are taken from the capsule around the pneumococcal bacteria and joined to a non-toxic diphtheria protein called CRM197.

### Pneumococcal Conjugate Vaccine (PCV13) - MedlinePlus

Pneumococcal conjugate vaccine (called PCV13) protects against 13 types of pneumococcal bacteria. PCV13 is routinely given to children at 2, 4, 6, and 12-15 months of age. It is also recommended for children and adults 2 to 64 years of age with certain health conditions, and for all adults 65 years of age and older.
